SOFTWARE RELEASE NOTES

CEMS Portal Version 6.0.1

This document provides the changes to CEMS version 6.0.1

Purpose of the Release

The purpose of this document is to communicate solved bugs in this release of CEMS software. It may also document workarounds and any feature restrictions.

Solved Bugs

- Mistype for Reasons Pre-Configuration Menu
- Pop-up notifications from devices can be viewed across all campuses
- Audit log sign-off is not properly recording the reasons for alarm events
- Clean up of reminiscence of action level to warning naming convention
- Non-clearable fault alarm indication in tile view and halo dots
